

FLAGLER COUNTY ART LEAGUE
November General Meeting Program

**“THE ALTERNATIVE PERSPECTIVE – A Complete Synoptic Image”
by Dr. Tom Anastasio**

Dr. Tom Anastasio will discuss image usage from the Renaissance to modern photomosaic images of the earth from weather satellites. For example, an Impressionist painting seen close up is composed of multiple vibrating colors and small brushstrokes but it is only from a distance that these form recognizable images. He will feature some of his own creations to illustrate the relationship of both ground and aerial perspective. In his own work, Tom layers water media, collage, torn handmade paper, sumi inks and text, to create abstract mystical images. A recent project, a 4 by 8 foot mixed media mural “9/11 NYC”, was first exhibited in New York City in the 9/11 Memorial Exhibit.

Dr Anastasio, who has won numerous awards and distinctions, has been a prolific teacher and international workshop instructor for more than 40 years. He is listed in “Who’s Who Among America’s Teachers” and is a member of the prestigious Silvermine Guild in New Canaan, CT. He maintains studios in Palm Coast and Huntington, CT and is represented in museums, including the Smithsonian, along with international corporate and private collections. In addition, Tom has co exhibited with fellow artists David Hockney, Robert Kaupelis, Louise Nevelson, Kenneth Noland and Frank Stella.

Come and enjoy a presentation by this highly creative multimedia artist!

Any questions, please call Ann DeLucia at 386-447-9875
